

Dear Parents/Carers,

Our topic for this term in KS1 will be all about climate change where we will find out about how climate change is affecting our planet and what we can do to help make changes. As part of this topic one of our lessons will be about how our rubbish affects the oceans and the creatures in it, and we would like to ask for your support in collecting some resources. Our aim is to use plastic materials and other waste products that typically end up in the ocean to create collages showing the effect it can have on our sea animals.

We would like collage materials and plastic waste such as:

- Plastic wrapping e.g. cellophane, clean food wrappers
- Plastic bottles
- Plastic bags
- Single use plastic
- Plastic containers
- Bottle lids

If you are able to provide us with any of these items, then we would be extremely grateful. Please send these items in with your child by the 20th January.

Thank you for all of your support,

KS1 Teachers
