School Health in Thurrock

NCMP Screening Results

In September 23, we informed you via your child's Parent Mail that we will be completing your child's height and weight screening for all Year 6 children.

This screening was completed on Thursday 2.11.23. If your child was in school on this day, you can now access their results via the Parent Portal.

Please access your child's health screening results and complete the short health questionnaire. It has lots of useful information. Click on the link below to register your child with the Parent Portal.
